

# Installation Guide

Hi, I hope you are doing well and staying safe and healthy.

Before going to the lecture, workshop, installing the required tools for this course, please ensure that you have installed Python and Jupyter Notebook on your System.

Don't worry; it is straightforward; just go to the official website of Python and Anaconda via the below link:

For Python: <https://www.python.org/>

For Jupyter Notebook: <https://www.anaconda.com/>

From the “Downloads” tab of Python and the “Get Started” tab of Anaconda, download the latest version (or the version you like) based on your operating system.

After doing this, join in the lectures and workshops to install the required tools and packages.

See you! :)
